

ATTACHMENT #5

Item 21 Attachment #1 471 Application Number: 376254

Contact Person's Name: Bruce Benson

and Phone Number: 434-975-9443

Computers in the Albemarle County School District are connected and share information among the various buildings (instructional and administrative) and use the network for data transmission and for Internet access. The connections between the buildings are leased from Sprint/Centel Telephone Company of Virginia, a telecommunications provider. While all school division facilities are included in the number of buildings and rooms, only instructional (non-administrative) sites have been used to estimate the costs for services and any discounts received will be applied only to the costs related to individual schools.

All services delineated here are provided through a multi-year lease agreement, "Agreement for Sprint Lightlink Service (3/27/95)", and an addendum to that agreement "Addendum #1 to Agreement for Sprint Lightlink Service (4/29/97)" between the County of Albemarle, Virginia and Sprint/Centel Telephone Company of Virginia

Service Provider	Services Provided Through Lease Agreement
SPIN: 143001418 Sprint/Centel Telephone Company of Virginia	WAN: Two-way interactive high speed data service provided to all instructional and administrative sites within the Albemarle County School District.

Please note that "best pricing" applies to all services provided through the "Agreement for Sprint Lightlink Service (3/27/95)" and "Addendum #1 to Agreement for Sprint Lightlink Service (4/29/97)" lease agreements. "Best Pricing" is agreed to mean that if after this lease contract was signed, Sprint LightLink Services or any comparable or higher speed data transfer service are offered at a lower price than those quoted in the contract, those prices will be in effect.

An addendum was signed on February 5, 2003 to upgrade the bandwidth available at each site from 10 MB to 100 MB, transported through a GB backbone. Costs for the upgrade and new monthly access fees are described in the table below.

Quantity	Product or Service Description	Unit Cost	Eligible Recurring	Eligible Non-Recurring
25	Infrastructure costs for service provider upgrades at schools	\$40,536		\$1,013,406
12	Access charge, per month for 25 schools	\$11,125	\$133,500	
		Total:	\$133,500	\$1,013,406
	SEE BELOW FOR AMORTIZATION STATEMENT			

Amortization Statement:

Albemarle County School District recognizes that the SLD program rules require amortization over a period of at least three years when up-front costs exceed \$500,000. Up-front costs include service provider recovery for components and installation. As indicated in the information above, the eligible up-front costs for Albemarle County School District are \$1,013,406. We elect an amortization period of 4 years, for an annual cost of \$253,352. This cost is shown in Item 23 of Form 471.

AFFIDAVIT OF MARK ROBERSON
CC DOCKET NO. 02-6

Charlottesville, VA ss)

Mark Roberson deposes and says as follows:

My name is Mark Roberson. I am currently employed by Sprint Corp. as an Account Manager in the K-12 Education group. In this capacity, I am responsible for sales and customer service to the K-12 Education group in an assigned geographic area in Virginia. One of the accounts for which I am responsible is the Albemarle County, VA public school system. I became responsible for this account on March 27, 2000 including management of the original Ethernet contract 97-2039 dated March 27, 1995.

The contract 97-2039 included one-time and recurring charges assessed by Sprint to the Albemarle County public school system for Ethernet service. These charges were designed to recover costs incurred by Sprint to purchase, install and maintain Sprintlink equipment behind the customer point of demarcation (that is, on the Sprint side of the point of demarcation). The Sprintlink equipment involved to provide the Ethernet service to the Albemarle County public school system was included in Sprint's regulated rate base as part of it's Ethernet infrastructure in the Charlottesville exchange and remains the property of Sprint.

Section 1(p) of original contract 97-2039 states that Sprint-Centel of Virginia may also provide and install "ancillary" network equipment. This offer was for equipment beyond the customer's point of demarcation (that is, on the customer's side of the point of demarcation) and did not constitute an offer to sell equipment to the customer any equipment within Sprint's infrastructure, including the Sprintlink equipment used to provide the customer with Ethernet service. To the best of my knowledge, Albemarle County Schools did not exercise the offer to purchase the "ancillary" equipment from Sprint as described in section 1(p) of contract 97-2039.

In 2003, I participated in negotiations for an amendment to original contract 97-2039 between Sprint and Albemarle County Schools for the provision of an upgraded Ethernet service configuration. The upgrade would increase the bandwidth from 10mb to 100mb and/or 1-gigabit. The addendum was signed on February 3, 2003. The one-time and recurring monthly charges in that addendum were intended to recover the costs incurred by Sprint to purchase, install, and maintain the switches used to provide Ethernet service to the Albemarle County School locations listed below. In order to provide 100mb and/or 1-gigabit of service, Sprint replaced the original Sprintlink equipment with the switches listed below. (It is these upgraded

switches which are the subject of the instant funding appeal.) Again, like the original Sprintlink Equipment, the switches are behind the customer's point of demarcation (that is, on the Sprint side), and to the best of my knowledge, this equipment has and always will be owned and maintained exclusively by Sprint. I helped negotiate this addendum to the original contract with the assumption that Sprint would retain ownership of this equipment, and to my recollection, there were no discussions between Sprint and the customer about selling or otherwise ceding ownership of this equipment to the Albemarle County school system. The equipment listed in the addendum only to inform the customer of the Sprint infrastructure to be deployed to support its Ethernet service.

AFFIDAVIT OF Charlie C. Williams
CC DOCKET NO. 02-6

Wake Forest, North Carolina. ss)

Charlie C. Williams deposes and says as follows:

My name is Charlie C. Williams, and I am an Engineer I – Transmission Engineering in the Network Engineering Department for Sprint. In this capacity, I was responsible for purchasing the equipment for the upgraded Ethernet service used by Albemarle County Public Schools for the amendment to contract 97-2039 dated February 3, 2003. The equipment is logged in Sprint's continuing property records.

The Ethernet equipment listed and inventoried by Sprint for the upgraded service was purchased by Sprint in the summer of 2003 and was placed in its regulated rate base as part of its Ethernet infrastructure in the Charlottesville exchange. This equipment acts as the demarcation point for the Ethernet service provided to the Albemarle County School System and remains the property of Sprint. This equipment is the property of Sprint and ownership will not transfer to the Albemarle County Public Schools.

According to my records, all of the equipment listed below is owned, maintained and installed exclusively by Sprint. All service visits by Sprint personnel to maintain this equipment are at our expense [no charge to customer], which is consistent with the manner in which all other Sprint-owned equipment is maintained.
